

LAMBORGHINI HURACAN PERFORMANTE

CARACTERÍSTICAS

MÊS/ANO: 01/2018

KMS: 0

CILINDRADA (CC): 5,203

POTÊNCIA (Cv): 640

COMBUSTÍVEL: GASOLINA

LUGARES: 2

COR EXTERIOR: CINZA GRIGIO NIMBUS

INTERIOR: ALCANTARA / FORGED COMPOSITES /
GIALLO TAURUS

EQUIPAMENTO EXTRA

PINTURA CINZA GRIGIO NIMBUS

INTERIOR FULL ALCANTARA PRETO

PACK INTERIOR FORGED COMPOSITES

BANCOS SPORT EM CARBONO / ALCANTARA COM

PESPONTO EM AMARELO GIALLO TAURUS

COSTURAS INTERIORES EM AMARELO GIALLO TAURUS

CINTOS SEGURANÇA EM AMARELO GIALLO TAURUS

PACK DARK CHROME INTERIOR

PACK NAVEGAÇÃO EUROPA

SUSPENÇÃO ELEVATÓRIA

JANTES 20" MIMAS FORGED (High gloss black) NERO LUCIDO

PNEUS PIRELLI P ZERO CORSA COLOR EDITION YELLOW

DISCOS CARBO-CERAMICOS COM PINÇAS EM AMARELO

GIALLO TAURUS

PACK STYLE EXTERIOR

TPMS

TRANSPARENT ENGINE BONNET+ FORGED COMPOSITES

COBERTURA VEICULO PARA INTERIOR

SENSORES ESTACIONAMENTO FRONTAL E TRASEIRO

COM CAMARA

BLUETOOTH

PREÇO:

SOB CONSULTA

Vehicle description

The HURACAN PERFORMANTE has reworked the concept of super sports cars and taken the notion of performance to levels never seen before. The vehicle has been re-engineered in its entirety, as regards its weight, engine power, chassis and above all by introducing an innovative system of active aerodynamics: ALA. The combination of these modifications and the skilled work of the team at Lamborghini, took the Huracán Performante to complete a lap at Nürburgring in 00:06:52:01 setting a new record for best lap and becoming the fastest standard production car at the Shrine of Speed. Just hop in and drive to understand that the Performante is different from all the other Huracán models, as it was designed with one thing in mind: to be the fastest. The car has been completely updated, improving the engine, increasing the performance of the steering and suspension, using ultra-lightweight materials, and introducing an innovative active aerodynamic system in order to improve the performance level and driving experience. All the new features of the Huracán Performante express performance. The front and rear spoilers, made entirely of Forged Composites®, enable the aerodynamics to be actively exploited to achieve maximum performance by increasing or decreasing the downforce as required. The new, even lighter wheel rims hold the new **Pirelli P Zero Corsa** tyres, providing incredible grip. THE INTERIOR fully reflects the character of the Huracán Performante, that is to say being the fastest. The interior fittings are made from the highest quality materials: the seats are made of carbon fiber, the interior parts of Forged Composites®, and the upholstery is made from Alcantara. All extremely light materials which contribute to and increase performance. THE ENGINE Totally renovated and redesigned with fluid dynamics optimized at both intake and exhaust, this engine is the aspirated V10 with the highest specific power. The new intake ducts come directly from Lamborghini Motorsport's experience and improve response at all speeds. The double clutch transmission (LDF) has been further perfected and now is able to support even the highest performance. All this wrapped up in the even more vibrant and thrilling sound of the new lightened exhaust system. ALA , Aerodinamica Lamborghini Attiva is a smart and innovative system that manages active aerodynamics. ALA adapts to the driving style and type of route. When necessary, it increases vertical load to assist stability and speed through curves, or it reduces aerodynamic resistance to assist acceleration and reaching the top speed. THE SUSPENSION, double wishbone architecture of the Huracán Performante's suspension systems guarantees perfect balance between usability of the vehicle and sports performance. The standard suspension is also teamed up with an optional system of magnetorheological shock absorbers that instantaneously respond to driving style and adapt to the road conditions and driving dynamics, improving control over the vehicle, especially on the circuit.

- ☑ MAX. SPEED >325 km/h (> 201 mph)
- ☑ ACCELERATION 0-100 KM/H (0-62 MPH) of 2,9 s
- ☑ ACCELERATION 0-200 KM/H (0-124 MPH) of 8,9 s
- ☑ BRAKING 100-0 KM/H (62-0 MPH) of 31 m
